

Merrychef Accelerated cooking technology fuels BP forecourts

Wild Bean Café from BP plc is at the forefront of the food to go revolution with food sales accounting for 13.5% of the leading forecourt retailer's turnover.

With 630 outlets across Europe and the successful opening of the first stand alone store at Portsmouth International Ferry Port, food on the move is a dynamic market for BP, which also runs 1,050 Petit Bistro outlets in Germany.

Graeme Wilding, Wild Bean Café food technologist, UK Retail, said:

"Merrychef's accelerated cooking technology supports the Wild Bean Café brand values of freshness and quality, providing food to order and cooked to perfection within seconds."

Merrychef technology and global service network has also enabled us to open up new business opportunities within our BP Connect franchise operations around Europe. The compact oven allows us to create cost effective food to go operations in smaller spaces while maintaining the Wild Bean Café quality we insist on.

Merrychef technology now forms part of the equipment blueprint as we expand the heat and eat concept across Europe."
